## **Idaho IBM System i Customers Gather in Sun Valley for Updates and Collaboration**

*Miicor Consulting facilitates 2<sup>nd</sup> annual gathering with presentations and demonstrations from IBM experts and IBM solutions partners.*

**Boise, ID – May 21, 2007** – Miicor Consulting just completed its 2<sup>nd</sup> annual IBM Summit in Sun Valley – a gathering of IBM System i customers from throughout Idaho. The event included presentations from 6 technical/solutions experts from IBM as well as a Solutions Faire where 8 IBM Partners provided information and demonstrations on leading platform solutions. The IBM Summit represents the only formal venue for companies in Idaho to collaborate and learn of recent developments and product introduction for the IBM System i platform.

“The IBM summit represents a unique opportunity to educate organizations in Idaho on how they can continually extend the value of their investment in the IBM platform,” said Dick Miiller, president of Miicor Consulting. “Without a formal user group in Idaho, our IBM customers don’t have many options for this type of forum and we are pleased to facilitate this annual event.”

Attendees represented a cross section of Idaho industries and public sector. They rated the IBM Summit a success based in evaluations forms submitted. Survey results revealed that the content and event format were “on target” and that many things learned during the presentations and demonstrations are intended to be immediately applied to their System i environments. Comments included; “Wow! It’s great to hear about all of the areas a System I can be used for” and “Very good overall overview of what’s happening with the System I platform.”
